Art Unit: 1641

1) Restriction is required under 35 U.S.C. 121 and 372.

2) This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

3) In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a method for analyzing a complex protein mixture using at least one fluorescent probe.

Group II, claim(s) 14-22, drawn to a method of analyzing a proteome by differentially analyzing activated and inactivated portions of the proteome.

Group III, claim(s) 23-25, drawn to a multi-step method of analyzing a proteome which involves receptor binding of the probe.

Group IV, claim(s) 26-36, drawn to methods for screening molecules which use a combinatorial chemical library.

4) The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the methods of the different inventions require different steps and/or different combinations of steps to perform the recited analyses.

5) Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
